

THE "ADAPTABLE" ROTARY HORSE BROOM.

(AMES' PATENT.)

Indispensable for cleansing roads before treating with tar, and invaluable for all ordinary street and road cleansing purposes.

The use of Horse Rotary Brooms has now become general by all Municipal Authorities for cleansing the roads and streets of surface detritus.

These Brooms, as manufactured, have proved exceedingly valuable in rapidly sweeping the surface of roads and streets. One defect in the construction of the Brooms, which has been brought prominently into notice since the treating of the surface of roads with tar has been extensively tried, is the fact of the Brooms being made in one straight and rigid length, which causes them to imperfectly cleanse roads of irregular contour. This is a serious defect as any dust or surface detritus left in the hollows or lower parts of the road with a quick contour prevents the tar from penetrating the road.

The "ADAPTABLE" Broom is the only one on the market which overcomes this defect.

The "ADAPTABLE" Broom is divided into sections; each section working loosely on the axle independently of the others. The sections oscillate and rise and fall according to the varying curvature of the road surface, effectually cleansing every portion of the street or roadway.

The "ADAPTABLE" Broom has far greater cleansing powers and a much longer life than the ordinary rigid Broom. It will be obvious that as the sections of the Broom are able to rise and fall according to the varying contour of the road surface, all unnecessary strain and wear is removed, whilst the cleansing powers of the Broom are immensely increased.

Estimates for the "ADAPTABLE" Rotary Horse Broom mounted complete, or for Brooms made to fit any other make of Broom-carriage, may be had upon application to—

A few Extracts from numerous letters received expressing
appreciation of our Patent Adaptable Horse Broom.

From W. H. PRESCOTT, Esq., A.M.I.C.E., ENGINEER & SURVEYOR, U. D. C., TOTTENHAM.

Dear Sirs,

I enclose herewith copy of report from the Works' Superintendent, and am glad to inform you that the Broom is now working most satisfactorily and appears to be a great improvement on the other Brooms.

P.S.—I enclose order for another three Brooms.

REPORT. To W. H. PRESCOTT, Esq., ENGINEER & SURVEYOR, U. D. C., TOTTENHAM.

Dear Sir,

I beg to report that the Spindle and set of Rotary Brooms supplied by the Ames Crosta Co. are working well and sweeping much cleaner than the ordinary brooms in use; also the "filling" is of a better quality and lasting longer than the old pattern broom.

Yours obediently,

(Signed) H. W. CANT,

Works Superintendent.

From W. V. ANDERSON, Esq., CITY SURVEYOR, WINCHESTER.

"I shall be pleased to recommend your "Adaptable" Rotary Broom, which I found quite satisfactory."

From ALFRED J. SMITH, Esq., SURVEYOR, U. D. C., CAVERSHAM.

"The Rotary Broom is working splendidly and is doing its work very efficiently."

From EGBERT RUSHTON, Esq., SURVEYOR, U. D. C., CLEETHORPES WITH THRUNSCOE.

"The Adaptable Rotary Road Broom gives us entire satisfaction and is an advance on the old style. When the brooms are worn out will certainly adopt the new style."

From E. BUCKHAM, Esq., BOROUGH SURVEYOR, IPSWICH.

"Our experience here with the Brushes is that they are better than the ordinary brushes on irregular and badly kept streets."

From J. S. KILLICK, Esq., SURVEYOR (HIGHWAYS), R. D. C., CROYDON.

"The Patent Adaptable Rotary Horse Broom supplied by you has been satisfactory."

From G. W. MANNING, Esq., ENGINEER & SURVEYOR, R. D. C., STAINES.

"It accommodates itself to the surface of the road better."

From C. R. S. KIRKPATRICK, Esq., CITY ENGINEER, NEWCASTLE-ON-TYNE.

"I hope at a future date to order several more of the Adaptable Horse Brooms."
